Customer address Unit A2 Cradley Business Park, Overend Road, Cradley Heath, West Midlands, B64 7DW, UK.

Project No. PPE800000 **NEL Test Mark** MPHMM

Product Received 13 May 1999 **Product Tested** 13 & 14 May 1999

Product Deadweight Anchor System

Model 'Wireanka'

Parameters Anchor system consisting of an 8 mm dia 7 x 7 construction horizontal stainless steel wire rope running-line mounted on the upright pedestals of CE approved 'Weightanka' Class E dead-weight anchors. Each anchor consisted of two rectangular galvanised steel plates forming a cross, linked at mid span by an M20 hex set bolt. The cap screw is fastened into a 50mm dia. x 200 mm or 400 mm long pedestal c/w eyebolt. 22 mm dia. holes are drilled at the end of each arm of the cross, at a radius from the centre of 750mm. These holes locate the cross onto mounting pins vertically fixed into rubber coated steel base weights. The steel base weights have an evenly spaced pattern of raised concave discs measuring 25mm O.D. and 20mm I.D. x 6 mm deep. A galvanised steel tie bar is mounted between two adjacent base weights to prevent distortion of the system during use. The total weight of the system can be varied by adding more galvanised steel weights. This is surface dependent. The additional weights are held captive by spring-action locating pins passed through the mounting pins. The user attaches the appropriate PPE to the wire running-line mounted between Weightanka pedestals.

Category of PPE III

Method of Test Tests were carried out to the appropriate clauses of BSEN795 : 1997.

Remarks The above mentioned product fulfils the essential health and safety requirements of directive 89/686/EEC and its amendments.
